Transmittal No. 22-27

Australia – AGM-88E2 AARGM E2 Missiles

WASHINGTON, June 21, 2022 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Australia of AGM-88E2 AARGM E2 Missiles and related equipment for an estimated cost of \$94 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of Australia has requested to buy up to fifteen (15) AGM-88E2 Advanced Anti-Radiation Guided Missile (AARGM) Guidance Sections; up to fifteen (15) AARGM Control Sections; up to fifteen (15) High Speed Anti-Radiation Missiles (HARM) Rocket Motors; up to fifteen (15) HARM Warheads; and up to fifteen (15) HARM Control Sections. Also included are AGM-88E2 AARGM All Up Round (AUR) tactical missiles; AGM-88E2 AARGM Captive Air Training Missile (CATM); HARM G-Code AUR; HARM G-Code CATM; M-Code GPS receivers; containers; support and test equipment; EA-18G Growler test support; spare and repair parts; software (Classified and Unclassified); U.S. Government and contractor engineering support; and other related elements of logistical and program support. The estimated total value is \$94 million.

This proposed sale will support the foreign policy and national security objectives of the United States. Australia is one of our most important allies in the Western Pacific. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the region. It is vital to the U.S. national interest to assist our ally in developing and maintaining a strong and ready self-defense capability.

The proposed sale will improve Australia's capability to meet current and future threats by suppressing and destroying land- or sea-based radar emitters associated with enemy air defenses. Destruction or suppression of enemy radar denies the adversary the use of air defense systems, thereby improving the survivability of its tactical aircraft. Australia will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be Northrop Grumman Information Systems (NGIS), Ridgecrest, CA. There are no known offset agreements proposed in connection with this potential sale.

Implementation of the proposed sale will require U.S. Government and contractor representatives to visit Australia on a temporary basis in conjunction with program technical oversight and support requirements, including program and technical reviews.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law. The description and dollar value is for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
